"A.P." Pioneer in Movement of Grain via Western Route

The Alberta Pacific elevator in this district is part of a system of 375 country elevators, coal sheds and flour warehouses located in principal grain growing areas throughout Alberta, Saskatchewan and Manitoba, and operated by The Alberta Pacific Grain Company, Limited. Terminal elevators of the Company at Vancouver have a capacity of more than 6,000,000 bushels. In addition the "A.P." has terminal elevator connections at the Head of the Great Lakes, and office forces in Calgary, Winnipeg and Vancouver. The Alberta Pacific and predecessor companies commenced business in 1901 in territory now part of the province of Alberta. Wheat growing in that area was then in its infancy. What was to develop into the "A.P." system was brought into being by John I. McFarland, then a young man yet to earn his reputation in the grain trade. His record of fair-dealing with all farmers and customers who came in contact with him earned for him an enviable reputation which he carried throughout his progress and successes in the Trade. The Company soon expanded to all the principal grain growing areas of Alberta, and into Saskatchewan and Manitoba.

With the commencement of movement of grain through the Port of Vancouver, upon the completion of the Panama Canal, the "A.P." in 1924 became a pioneer in the development of the western movement of grain. At its inception the "A.P." management realized the great asset of a grain company was personal contact to the greatest possible degree with its customers. The door of the General Manager, John McFarland, was always open to any farmer to

Oyen School Fair Tuesday, September 20

The following committees will be in charge at Oyen school fair on Tuesday, September 20.
Vegetables—Mrs. Chas. Stewart, Mrs. G. Langmuir and Alf Gibson.
Live Stock—Dr. J. P. Kerr and E. H. Church.
Flowers—Mrs. T. Lees.
Poultry—D. Warwick.
Grains and Grasses—Thomas Lees.
Cooking—Mrs. C. L. Dunford, Mrs. H. B. Johnson and Mrs. S. A. Miller.
Sewing—Mrs. C. P. Snyder, and Mrs. R. E. Gillespie.
Industrial Art—J. F. Martin, G. P. Freebury, Miss Todd, Mrs. A. C. Robinson, and the Misses Desmond, Lees and Wright.
Fellowship and Composition—Esther Lynett.
Elementary Science—Rev. E. F. Kemp and J. P. Roraback.
Cocoa—Mrs. Nunn and Mrs. Love.
Sports—Messrs French, Watrin, Warwick, Norris, Morrison and Martin.
Grounds Superintendents—Messrs Swainson, Boyce, Church and Wade.
Physical Training exercises will commence at 1 o'clock p.m. under the direction of C. L. Dunford.
At 3 p.m. the judges will speak in the agricultural hall.

Langridge and W. Love Make Clean Sweep in Tennis Tournament

C. H. Langridge and Winnie Love made a clean sweep of the tennis club tournament played over the week-end and finished Labor Day. Playing as partners they won the Challenge cup in the mixed doubles, Miss Love won the ladies' singles, and C. Langridge won the men's singles.
The games: Ladies' Singles—(first named of each pair winner) C. Wright-C. Desmond, W. Love-Bella Lees, Inna Thygesen-Mrs. Burns, C. Love-B. Scott, J. Love-C. Love, W. Love-C. Wright, J. Love-Inna Thygesen, Winnie Love-Jennie Love.
Men's Singles—Scott Burns, Charlebois-Pokojoy, C. Johnson-B. Love, Langridge-Lynett, Charlebois-Scott, Langridge-C. Johnson, Langridge-Charlebois.
Mixed Doubles—Pokojoy and C. Desmond-Lowe and Inna Thygesen, Lynett and J. Love-Johnson and B. Lees, Burns and C. Wright-Scott and B. Scott, Langridge and W. Love-Charlebois and Mrs. Burns, Lynett and J. Love-Pokojoy and C. Desmond, Langridge and W. Love-Burns and C. Wright, Langridge and W. Love-Lynett and J. Love.

pass the time of day or to assist in the settlement of any difficulty being experienced in connection with the handling or marketing of grain.

When financial control of the Alberta Pacific changed hands in 1926, John McFarland retired from active participation in the grain trade, and devoted his time to his private interests.

The policy of fair-dealing and direct contact with its thousands of customers, so well established by the founder of the "A.P." system, is that of the present management headed by Mr. James R. Murray.

Preserving Fruits

Our car of British Columbia Preserving Fruit will be on track here Friday and Saturday, September 16 and 17.

Wait for this as it will give you the best fruit at the best prices.

Italian Prunes, per case	1.25
Peaches, No. 1's, per case	1.65
Flemish Beauty Pears	2.40
Hyslop or Red Crabapples	1.90
Wealthy Apples, per crate	1.75
Ripe Tomatoes, per 4 basket crate	.95
Green Tomatoes, per case	1.35
4 Baskets Plums	1.65
20 lbs. sack Dry Onions	.55

EXTRA SPECIAL—B. C. White Sugar.
By participating in a carload proposition we are able to offer you this commodity at
per cwt. **5.95** per 50 lbs. **3.05**
(for a limited time only)

Cool Weather is Approaching---We are ready for your enquiry on Blankets and Bed Clothing

No. 1 Quality Alabama Double Blankets, extra large size, grey or white, per pair	2.45
Second size, per pair	1.95
Heavy quality large size Jasper Blanket, suitable for Bed Cover or Harvest blanket. Very special price, per pair	2.35
Auto Rugs in fine quality Plaid Patterns Good size, each	3.95

Full stock of Grey or White Wool Blankets
Selling at Specially Close Prices

A Model Mining Camp

Only Well Equipped Men Get Into Echo Bay

While the rush to Conjuror's Bay gold strike continues unabated (it is probably between 75 and 100 men on the ground now), Cameron Bay and the area immediately surrounding it does not lack excitement. Despite the fact of the main settlement by the gold fever, the number of permanent residents continues to soar and every day sees the community roving itself deeper on the wooded frontier that three months ago was entirely unexplored.

Uniformed law and order has come in the shape of a Royal Canadian Mounted Police detachment, the officers arriving when the Speed 11 made her second trip across from Port Maudslayi. Echo Bay, unlike most mining camps, has failed to produce any "bad men" to date, this no doubt being due to the fact that it is accessible only to well-equipped men with definite business to do. There is a real place in the life of the field for the police, however. Handling manufacturers is only one item in the complex duties of the Royal Mounted.

Cameron Bay's first white woman, Janet J. Byrne, arrived in the person of Mrs. J. Byrne, a woman of such such as no bathing beauty could produce and dressed in masculine attire, she ended a journey of 2,000 miles which her husband and two other men from Beryon, Alberta, brought a couple of power-driven scooters from the waters of the Peace to Echo Bay. With two months of river, lake and rapid behind her, she emerged in the conventional garb of civilization. So the all-male world known for many long months has collapsed. So far no protests have been heard.

J. J. Byrne, head of the Great Bear Lake mines, was a recent arrival by aeroplane and, donning the regulation drill clothes and high boots of the area, he has plunged into the activities of the field with such vigour that marks every one from Conjuror to Hunter Bays. Mr. Byrne reported that when he was at Fort Resolution traffic was still headed toward the MacKenzie, the Bear and the lake. Obviously there is to be no peering out of the first curv of land which has already descended on Great Bear, but the rush to the field will continue throughout the period of open water.

Many of the early arrivals and the majority of the late ones intend to remain over the winter. The latter have brought well-stocked outfits to make this possible. In most cases, however, cabin building is being left until a later date. The main idea at the moment is to get to Conjuror Bay while there is still open ground.

Find Free Gold

Important Discovery Reported In Great Bear Lake Mineral Field

Free gold, the first ever found in the field, was picked up on the Oro Group, staked in the spring of 1931, by Charles Sloan, veteran prospector, according to word received from Cameron Bay in the Great Bear Lake mineral field.

This group adjoints the Eldorado group and Labine Basin and work is proceeding feverishly to tap the discovery and ascertain its extent. The free gold is quite coarse and appears in particles about the size of wheat grains in the quartz.

Named By Experts

Two experts, each with a costly outfit, fished for a while morning without catching anything. They were about to pack up when a little girl threw out a line and pulled up a two-pounder—a beauty.

"What kind of a fish is that, my child?" asked a passer-by.

"Those gentlemen," she replied, "call it a 'dammit'."

There are only about 40,000 Eskimos in the entire Arctic region.

W. N. U. 1938

UNIQUE SERVICE COMMEMORATES EIGHT HUNDREDTH ANNIVERSARY OF ABBEY

A special service was held in the wonderful ruins of Fountains Abbey, Yorkshire, England, to commemorate the 800th anniversary of the laying of the foundation stone. Thousands flocked to the beautiful silver-grey ruins of the famous Cistercian Abbey, to take part in the rosters have, including the Duke and Duchess of York. The picture on the left shows the arrival of the popular Duke and Duchess, while the photo on the right gives a general view of the service inside the Abbey.

Record Hard To Beat

New Jersey Man Has Been Commuter Sixty-Four Years

Admission H. Day, who will be 82 years old in November, has begun his sixty-fourth year as a regular commuter between Chatham, New Jersey and New York. When he stepped aboard the train the other morning at his home town to go to his desk in the office of the Marine Midland Trust Company, at 120 Broadway, where he is an official, he started on his thirty-third commuter trip around the world, figuratively speaking. Officials of the Lackawanna railroad have estimated that in sixty-three years Mr. Day, who has earned the title of champion commuter of the nation, has covered 856,000 miles on the railroad to and from work, equivalent to thirty-eight times the circumference of the earth.

Oddest Of Odd Jobs

Cornet Player Assists In Tuning Musical Auto Horn

The odd jobs around factories, automobiles and automotive parts are made are among the oddest of all human undertakings. For instance, there is the job of the cornet player in one of the plants making a very special and expensive motor car. When a finished horn comes from the production bench, the cornet player toots an arrangement of four notes. An assistant with a musical car then blows the horn. If they decide it is pitched correctly, it is sent on to the market place. If not, it goes back for further tuning.

Strike At Price Cutting

Canadian Retail Druggists May Ask Aid Of Parliament

Canadian retail druggists may ask the Dominion Parliament to amend the Combines Act so as to permit retail druggists to fix reasonable prices upon trade marked goods. Dr. R. B. Stanbury, secretary of the Canadian Pharmaceutical Association, stated in Toronto.

His statement followed discussions at sessions of the Canadian Association and the Ontario Retail Druggists Association where delegates deliberated upon possible legal ways of fixing prices so as to strike at price cutting.

Advertising Does Pay

A young actress one day lost a string of pearls, and she advertised the fact in a weekly journal. Afterwards, when asked if she had recovered the lost property, she answered excitedly: "Yes! And isn't advertising wonderful? The pearls I lost were only imitation, but those that have been returned to me are the real thing!"

University Makes History

For the first time in the history of the University of Toronto, three dentists have been given honorary degrees. This demonstrates that the members of this profession are developing an even greater pull and that due recognition is given of their services to University pupils after they have finished grinding their teeth over examination papers.

"The little needs to be more sharply drawn between careful and reckless flying on the part of airplane pilots is the conclusion of a university professor, who has made flight tests to study safety."

The Oath Of Allegiance

Has Been Cause Of Trouble With Ireland Before

The furore in Ireland over the oath of allegiance is not the first time the oath has caused trouble in Great Britain and Ireland. Both Sir David Salomons and Baron Lionel de Rothschild objected to the oath containing the phrase: "True faith of a Christian." In 1868 these words were deleted for all members of non-Christian religions.

Later, Charles Bradlaugh, atheist lecturer and writer, who was strongly republican in sentiment, objected to taking any oath at all. He had to be ejected from the House of Commons.

It then became optional with the members to take either an affirmation or an oath of allegiance. Occasionally some member balks at the oath and affirms his allegiance, instead. However, most of the members are sworn in by the old-time oath.

Ever since 1906, British history has been written with such objections to the waters of government. Each day plays its part in the progress of democracy. The good points of the objections are made part of the constitution, and the bad are just discarded.

Chinese Woman Gets

Degree From Japan

Former Shanghai Professor Is Now Doctor Of Science

The first Chinese woman to receive a doctor's degree from a Japanese university is Miss Tso Wai-sun, former professor of chemistry in the Taitung University, Shanghai, who has been awarded a degree of doctor of science by the ministry of education. Her thesis was "A Scientific Study of the Digestibility of Rice Starch," and was accepted by the science department of the Imperial University, Kyoto.

Miss Tso is 37, and attended school in Tokyo before entering Columbia University, New York, where she received her bachelor's degree in science.

Judge—"Do you know the meaning of an oath, madam?"

Witness (profoundly)—"Your honor! An' me husband shippe' before the mast these fifteen years!"

Strange Manifestation

Germany Having Problem In Connection With Nudist Cult

Among its other perplexities the German Government has the nudist on its hands. The passion to go about unclothed is sweeping the world. Nudism has been common, we are told by travellers, in parts of Russia for some considerable time. It has cropped out in unpleasant manifestation in Canada among the Doukhobors as a form of mass protest against real or imagined grievances. Suits of anti-bathers who are nudists, or within a wisp of it, have sprung up in England, but the most determined cult of skin-worshippers is apparently in Germany, and the German Government is trying to force its nudists back into their clothes by the imposition of fines.

We are so close to our own times that only by making a special effort can we realize what an eccentric age it is. Standards, and values, and principles, and beliefs which were the controls of human conduct for a century have, during the past dozen years, been scrapped and tossed overboard into the ocean of uncertainty on which we are sailing. The old ways have been a mark of uncertainty and disturbed periods for the races of Northern Europe to develop cases of nudism. To go naked is the most original thing a civilized person can do; the most arrogant challenge he can throw in the face of convention and society.

To what extent the epidemic of nakedness in Germany can be explained by this theory it might be hard to say. It is an extraordinary indication of how abnormal are the conditions into which sections of the German people have fallen, and the effects the conditions have had on their behaviour. Nudism throws a curious sidelight on German trends under heavy political and social pressures—Mandatory Free Press.

New Way To Raise Money

Switzerland Has Parade Of Ancient Curs To Aid Jobs

Venerable motor cars from many countries are recently recruited from their well-earned rest and paraded before the citizens of Zurich, Switzerland, as a campaign to help the unemployed of that city.

In a programme organized by the Swiss Automobile Club and other groups interested in automotive transportation, a parade of 450 vehicles, ranging from luxurious limousines to street cleaning equipment, was a feature. Twenty-five of these were obsolete cars produced between 1890 and 1910.

Automobiles from five countries took part. The United States led with nineteen entries. Next came Germany with five, followed by Italy with four, France with three, and Austria with one entry.

The Poultry Industry

Says Canada Can Compete Successfully In Empire Markets

Poultry men in Canada are having a difficult time, but they are not down-hearted, F. C. Elford, of Ottawa, told the national conference of agricultural officials meeting at Toronto.

Suggestions that Canada could not compete with European countries into which the European producer had some advantages in shipping costs, Canadian farmers are far ahead in high production, good sanitation, lower taxes and a lower cost of feed.

Rail Safer Than Road

Figures For Accidents and Fatalities Show Big Spread

Comparing the accident figures for road and rail in Great Britain, C. T. Cramp, at a national road conference, stated 239 persons were killed on railways last year, 200 of whom were railwaymen, whereas 6,991 were killed on the roads. Every day 18 are killed in road accidents. There were 22,880 injured on railways, including every accident, however trivial, whereas on the roads the number reported was 202,119, in addition to thousands of accidents not reported.

Country Ones Are

The inspector (examining a class of boys) picked on a ruddy-faced country lad.

"Now, boy," said the inspector, "do you know what vowels are?"

"Yes, sir, I know what vowels are!"

"Well, what are vowels?"

"Why, sir, vowels be chickens!"

George Washington was made an honorary citizen of France in 1793.

A Priceless Possession

Famous Peacock Throne Of India Worth Thirty-Five Millions Dollars

Valued more at \$35,000,000 for the India in the thirteenth century for the Great Moghul, the exquisite Peacock Throne, written Persian legend in the illustrious Wazir of India, was taken from Delhi in 1739 to Tehran by Nadir Shah, and when in Persia last year it was lucky enough to be able to see this magnificent piece of workmanship.

As we arrived at the Palace gates, the soldiers armed and two moderns approached to conduct us through the courtyard, where fountains played in a long marble basin, and we went through an arched way into the inner garden. Delicately arched bridges traversed the little artificial lakes and lilypond streams, and lily ponds were reflected in the clear cool water.

Two more soldiers and a high official of the court met us at the entrance to the Palace itself, the walls of which were covered by colored tiles of various designs. To the right two square towers denoted the "Kendeh" or women's quarters.

We entered the Shah's residence by a triple doorway, supported by four pairs of marble columns, mounted a handsome staircase and were conducted, as through a succession of magnificently carpeted rooms till at last we reached the Treasury Room, in the presence of the Shah's officials, who solders the seal of the lock was broken, and a moment later the door was thrown open.

It was an extraordinary indication of how abnormal are the conditions into which sections of the German people have fallen, and the effects the conditions have had on their behaviour. Nudism throws a curious sidelight on German trends under heavy political and social pressures—Mandatory Free Press.

Besides the throne there is a couch of similar workmanship, about eight feet by five, and standing some three feet from the ground. Cushions of silk are placed to represent a peacock's breast, and there is a pair of steps for His Majesty to ascend. On this the Shah used to recline when holding their audiences, but now the present Shah uses the "Takht-i-Mar-mar," a wicker marble arm chair, six feet long—though not to be compared with its counterpart. At the back of the couch is a scintillating circular set of large diamonds, about a foot across, which a mechanical contrivance behind it revolves on state occasions.

The Treasury Room is lined with mirrors which reflect each other over and over again. In cases along the walls were seven and necklaces, bangles, gold cups and plate, mosaic pictures, a terrestrial globe in precious stones and treasures of various sort from every region of the world.

Once more the door is locked and sealed, the officials bow to each other, the soldiers salute, the keys carried away; we descend by another staircase, and our visit to the Shah's dwelling is over.

Black—"What did her father advise when you told him you loved his daughter, but only had a hundred dollars saved up?"

White—"He advised me to invest it all in a one-way railway ticket with no stopovers!"

Australia supplies 65.3 per cent. of China's wheat imports, the United States 18 per cent, and Canada 14.5 per cent.

W. N. U. 1938

First Results Obtained In Scientific Attack on Weeds In The Prairie Provinces

Weeds stand pre-eminent among the causes of agricultural losses in Canada and caddy enough they have been the last of the pests of agriculture to occupy the serious attention of scientific investigators, states a report entitled, "Weed Survey of the Prairie Provinces," issued as the first publication of the National Research Council's Associate Committee on Weed Control.

In a popular account, entitled, "Weeds and Their Control," prepared under the auspices of the Committee for general distribution and issued simultaneously, it is declared that the worst weeds are widely adaptable as to soil and climate and have recently settled areas such as the Peace River district are being gradually invaded and will eventually be overrun unless more effective defensive measures are adopted.

An estimate of the losses sustained is made: The committee's experiments have shown the wheat yield of weedy plots to be reduced by 10 to 44 per cent. Taking 16 per cent. as the average estimate of the crop loss due to weeds in the prairie provinces, this would mean that current prairie crops of wheat and barley, to well over forty million dollars for an average crop. To be added to this high cost is the additional cultivation done to keep weeds within bounds. The cost of threshing, hauling and shipping to Port Arthur and Port William is the equivalent of 96 train loads of 60 cars each of weed seeds, the direct cost of doing this is only a few other kinds of losses due to weeds.

Dr. Robert Newton, Director of the Division of Biology and Agriculture, National Research Laboratories, and the chairman of the Committee, states in a foreword that cultural methods of control are mainly dependent upon, since the application of chemical herbicides is practicable only for small areas. Dr. Newton says:

"For most of the weeds fairly successful cultural methods have been developed, and we may expect improvement along this line when we have available the results of the careful studies of the growth habits of weeds now being carried on by members of the committee. Previous progress has been achieved largely by the method of trial and error, and the need of more accurate knowledge with respect to the habits of weeds on the development of various weeds may in future be achieved in proportion as educational campaigns are successful in inducing farmers to co-operate in the application of the best methods. Community effort is essential, as with many weeds reinfestation from farm to farm takes place readily."

"Weed inspection systems might be improved by controlling within each province the responsibility for both the appointment and supervision of inspectors, and by extending the legislation to require the cleaning of the seed. Municipal appointments are often poorly qualified and ineffective. The educational aspect of the work should be emphasized."

"This report goes out as the first publication of the Associate Committee on Weed Control. A second, dealing in a popular way with weed control, in the light of the new information already available to the committee, is being published simultaneously. Other papers, based on the large volume of investigation work under way, will follow in due course. It is confidently expected that these will be recognized as important contributions to the solution of a problem of the first importance to agriculture."

G. P. McEwen, Professor of Agriculture, University of Manitoba; L. E. Kirk, Dominion Agronomist; Dominion Experimental Farms, Ottawa; George Godel, W. G. Smith and J. M. Manson, weed investigators of the Saskatchewan Department of Agriculture, the Alberta Department of Agriculture, and the Associate Committee on Weed Control respectively, are the joint authors of the report entitled, "Weeds and Their Control."

The origin of the Committee is described in these terms:

"No such body of knowledge exists about weeds as about animal and

plant diseases and insects, and until very recently no adequate investigations have been under way to obtain such knowledge."

"In recent years the exploitation by commercial firms of various chemicals as herbicides has provided a renewed interest in this old, but never widely used, method of weed control. The National Research Council, in response to requests from numerous organizations, called a conference in Edmonton in the fall of 1923, on the destruction of weeds by means of chemicals. At this conference it became clear that the whole field of weed control was urgently in need of investigation. The Council then appointed an Associate Committee on Weed Control, with representatives of the chief institutions concerned in the general problem, and the committee undertook the task of developing a co-ordinated programme covering all aspects of weed control investigations."

"Having regard to the practicability of organizing the work, it was agreed that the initial activities should have more particular reference to the prairie provinces. Mr. J. M. Manson, of the University of Alberta, was engaged by the committee to make a reconnaissance survey of this area, in order that the committee might have a basis of knowledge of the situation with which it was confronted. The results of the survey are set forth in this report."

Dr. Robert Newton, Director of the Division of Biology and Agriculture, National Research Laboratories, and the chairman of the Committee, states in a foreword that cultural methods of control are mainly dependent upon, since the application of chemical herbicides is practicable only for small areas. Dr. Newton says:

"For most of the weeds fairly successful cultural methods have been developed, and we may expect improvement along this line when we have available the results of the careful studies of the growth habits of weeds now being carried on by members of the committee. Previous progress has been achieved largely by the method of trial and error, and the need of more accurate knowledge with respect to the habits of weeds on the development of various weeds may in future be achieved in proportion as educational campaigns are successful in inducing farmers to co-operate in the application of the best methods. Community effort is essential, as with many weeds reinfestation from farm to farm takes place readily."

"Weed inspection systems might be improved by controlling within each province the responsibility for both the appointment and supervision of inspectors, and by extending the legislation to require the cleaning of the seed. Municipal appointments are often poorly qualified and ineffective. The educational aspect of the work should be emphasized."

"This report goes out as the first publication of the Associate Committee on Weed Control. A second, dealing in a popular way with weed control, in the light of the new information already available to the committee, is being published simultaneously. Other papers, based on the large volume of investigation work under way, will follow in due course. It is confidently expected that these will be recognized as important contributions to the solution of a problem of the first importance to agriculture."

G. P. McEwen, Professor of Agriculture, University of Manitoba; L. E. Kirk, Dominion Agronomist; Dominion Experimental Farms, Ottawa; George Godel, W. G. Smith and J. M. Manson, weed investigators of the Saskatchewan Department of Agriculture, the Alberta Department of Agriculture, and the Associate Committee on Weed Control respectively, are the joint authors of the report entitled, "Weeds and Their Control."

The origin of the Committee is described in these terms:

PRACTISING FOR RECORD

Dr. Robert Newton, Director of the Division of Biology and Agriculture, National Research Laboratories, and the chairman of the Committee, states in a foreword that cultural methods of control are mainly dependent upon, since the application of chemical herbicides is practicable only for small areas. Dr. Newton says:

"For most of the weeds fairly successful cultural methods have been developed, and we may expect improvement along this line when we have available the results of the careful studies of the growth habits of weeds now being carried on by members of the committee. Previous progress has been achieved largely by the method of trial and error, and the need of more accurate knowledge with respect to the habits of weeds on the development of various weeds may in future be achieved in proportion as educational campaigns are successful in inducing farmers to co-operate in the application of the best methods. Community effort is essential, as with many weeds reinfestation from farm to farm takes place readily."

"Weed inspection systems might be improved by controlling within each province the responsibility for both the appointment and supervision of inspectors, and by extending the legislation to require the cleaning of the seed. Municipal appointments are often poorly qualified and ineffective. The educational aspect of the work should be emphasized."

Quit Professional Careers

Noted Swimmers Reported As Intending To Give Up Quest For Marathon Honors

The Toronto Daily Star says that Margaret Revoir, Philadelphia swimmer, who won the \$3,000 first prize in the Canadian National Exhibition women's marathon swim, and George Young, noted Canadian marathon swimmer, will quit professional swimming after their marriage.

The Star quoted an unnamed "author" in Johnny Walker's training camp as saying Young and his bride-to-be would settle down at a country place near Bracebridge, Ont.

Eriasson Memorial Unveiled In Iceland

American Minister To Denmark Officially Dedicated At Ceremony

Frederick W. B. Coleman, American Minister to Denmark, unveiled at Reykjavik, Iceland, a statue of Laila Eriasson, the Icelandic woman, on his way to Greenland from Norway in the year 1,000, discovered America. The statue was presented to Iceland by the American people in 1930. Eriasson is reported to have touched Labrador, and possibly Newfoundland and Nova Scotia, in his voyage through the Arctic seas.

Model Coach Competition

Edmonton Youth Captures Coveted Prize For Two Years In Succession

Lawrence Drebert, of Edmonton captured both the grand championship and the senior championship trophies in the annual competition of the Model Aircraft League of Canada which ended in Winnipeg recently.

It was the second year the youth model built by the 15-year-old Drebert won the top of the list of competitors. The junior championship went to Joe Purvin, of Toronto.

Victor H. Hill of Vancouver, placed third in the senior scale model competition.

A Floating Museum

Admiral Byrd's Whaler Hones Exhibits Gathered At South Pole

Admiral Byrd's whaler, "The City of New York," on which he sailed to the Antarctic on his trip to the South Pole is berthed at Chicago in the lagoon across from the Hall of Science in the County of Wexford Exposition after a trip through the Great Lakes. The deck has been kept intact with the admiral's quarters untouched, and the rest of the boat has been made into a museum. Members of the expedition still on the ship act as guides showing visitors to the fair, the Adèle penguins, Emperor penguins and other exhibits gathered at the Pole.

Regimental Affiliations

Ontario Militia Units Form Fraternal Alliance With Antipodes

Specialized stamps have been issued in Belgium, dedicated to the glory of the Belgian infantrymen who fought and fell on the Yser, at Neuport, Dinan, and other sectors of the Western front.

The design common to both of the two denominations consists of a giant figure of an infantry soldier clad in great-coat, steel cap, and full equipment, striding amid a blaze of light through the ruins of a village.

A total of 40,000 pairs was printed, and the stamps were sold at a premium upon face value in aid of the erection of a national monument in Brussels. Their values and colors are 75 centimes (plus 3c. 25c.) red; and 1fr. 75c. (plus 4fr. 25c.) blue. They make a noticeable addition to the many lines of stamps associated with the world war and its aftermath.

Thousands Use Plane For Channel Crossing

Demand Is Greater Than Accommodation According To Report

During June 4,311 travellers flew by Imperial Airways between London and Paris, as compared with 2,206 in the corresponding month of 1931. The increase is notable and it is reported that the demand is greater than the accommodation. When Louis Blériot, the French aviator, made his pioneer flight across the English Channel, from Calais to Dover, a distance of 21 miles, in 37 minutes, on July 25, 1909, he had visions of the future of flying, but he could hardly have imagined that the science would make such tremendous progress in less than a quarter of a century.

New Type Of Building

American Laboratory Constructed On Lines Of Thermos Bottle

A big laboratory recently built in America has been made on the lines of the thermos flask. Its walls are constructed to prevent heat from leaking either in or out. It is built entirely of concrete, with not a single window. Outside is a thick coating of cork with an outer layer of bricks. This acts as a heat insulator and keeps the interior temperature at 70 degrees. It would take a month in the depths of the severest winter for it to fall to 69 degrees. The purpose of the laboratory is to study the light given out by atoms at certain temperatures.

Stained Glass Windows For French Chapel

Carry Figures Of Soldiers Instead Of Biblical Subjects

Three stained glass windows, destined for the rebuilt Belleau Chapel in France, which portray the historic tales that bind the allies and France, recently were exhibited in Boston. The figures of an allied soldier and a French pilot, Lafayette and Washington, Pere Marquette and Champlain, occupy the places usually reserved for biblical subjects.

Sir George Williams was the founder of the Young Men's Christian Association.

Vancouver Now Claims To Be The Largest Grain Shipping Port In The Dominion

One-Third-World's Sheep Within Empire

Nearly one-half of the world's raw wool and over two-thirds of the wool entering world trade are produced within the British Empire. Exports of home-grown wool from Canada have developed rapidly since the war, these exports now amounting to a yearly average of 7,000,000 pounds, about 40 per cent of the entire Canadian production.

The world's sheep population is estimated at nearly eight hundred million head, of which about one-third are in the British Empire. They produce between 3,500 to 4,000 million pounds of wool yearly, and of this amount about 1,500 million pounds, including much of the best wool, comes from the Commonwealth of Australia, South Africa and New Zealand. Outside the Empire the important producing areas are the United States and Russia. Of these territories only South America has a surplus for export.

In 1921-22 Vancouver exported 6 per cent of the Canadian wheat crop. In 1931-32 this port exported 41 per cent of the Canadian wheat crop. Montreal and other eastern Canadian ports 37 per cent and United States ports 19 per cent.

Ten years ago Vancouver's oats export was 250,000 bushels; last year it was 7,000,000 bushels.

Ten years ago this port's grain export to Europe were 4,500,000 bushels; in 1931 it totalled 71,000,000 bushels.

Last year's grain export from Vancouver was 34,000,000 bushels of all grains, second highest amount in history of the port. Records were made in quantity shipped to Europe, in movement of oats, in total percentage of Canadian crop exported.

Something New For Chicago World's Fair

Various Stages Of Completed Taking Place Of Completed Exhibits

Chicago World's Fair in 1933 will be built on the theory that the "will exhibit" of previous exhibitions is out of vogue. Every exhibit will be in "motion." Instead of completed parts, the public will be shown the various stages of the manufacture. Because of this policy there will be thousands of employees working on regular shifts in temporary factories during the six months of the Fair. It is expected that 30,000 persons will be on the payroll of the various concessionaires, exhibitors and educational displays.

Fresh Water Leviathans

Larger Boats Make Faster Time On Lake Trips

In only a few years over the century Willand locks have grown from 110 feet long to 826 feet, because Canadian business requires to handle his boats that have grown from 100 feet to 120 feet. Moreover these freshwater leviathans that we have come to carry our wheat and ore can no longer spare the time to dawdle away 20 hours between Erie and Ontario as they have had to do. Speed goes with size nowadays and our newest and biggest carriers with their 25,000 tons under hatches can pass from lake to lake and clamper up or down the cliffs in a matter of the time. — Montreal Star.

Dog Accepts Challenge

Carries with three bantamists Miss Peggy Tyson of Winchmore Hill, England, waved them playfully before her pet terrier. The dog carried off the challenge and played up to the money. Miss Tyson was able to collect and match enough of the pieces to have the bills cashed at the local post office.

Prices of agricultural products in Chile are increasing.

Send Me Five Pounds

"When I return from Paris," says you are going to write to "No." — Gutierrez, Madrid.

Sir George Williams Was the Founder of the Young Men's Christian Association.

STAND OF DOUGLAS FIRS

Stand of Douglas Fir on Vancouver Island, British Columbia. There are 117 billion feet of this timber growing on Vancouver Island.

When somebody said that trees were a thousand friends to man they did not exaggerate. It is for this reason that Mr. Frank D. Barjum is carrying on a Dominion-wide campaign for the conservation of our Canadian forests. The above picture shows a handful of Douglas fir near Victoria. There are estimated to be over 120 billion feet of this timber growing on Vancouver Island. Mr. Barjum has already bought a tract which is to be preserved for the public in his fight for the conservation of our timber.

Mr. Barjum says: "Trees protect and beautify our farms and gardens, protect our drinking water supplies, our water power, the game, the fish, provide lumber and fuel, pulp and paper, labor and transportation, taxes and dividends; are our greatest

promoter of health, beautify our city streets, protect our highways and check the ever growing menace of dust storms and hail, provide shelter from the scorching days of sun in summer and the icy blasts of winter, prevent cyclones, forest fires, floods erosion and loss of fertility of the soil, and are a recreation and a tourist industry which, without cost, to the country, ranks second in its importance, second only to the forest, pulp, our four greatest industries are completely dependent upon our forests and in fact nothing that we eat or wear can be produced, manufactured or transported without the aid of wood."

So many uses (3,500 in number), or is of such vital importance as trees."

438

VARIOUS POINTS ABOUT THIS SMART DRESS HAVE BEEN THOUGHT OUT FOR MATRONS

For instance, the one-sided softly falling over cuts the bodice neatly. Still more helpful perhaps is the broken line, created by the partial belt arrangement, which gives height to the figure. The inset panel at the centre-front, also does its bit toward slenderness.

Printed crepe silk is a lovely mode. The vestee is lace. Style No. 438 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 38 requires 4½ yards of 38-inch, with ½ yard of 10-inch lace. Cotton crepe may be used in sheer batiste or lady novelty weaves. Sheer woollens are also suitable.

Price of pattern 25 cents in stamps or coin (cash is preferred). Wrap coin carefully.

THREW AWAY HIS STICK

When Solatium Yielded to Kruschen

There can be no doubt that this man has finished walking with a stick, for it is now four years since he discarded it.

He writes:—"For 18 months I suffered with chronic catarrhs and rheumatism, and was unable to walk without the aid of a stick. But after taking Kruschen Salts for a short time, I was able to throw away the stick. It is now four years since this happened, and I have had no return of the complaint, and have not lost a day from work. I shall never be without Kruschen Salts, as they are worth their weight in gold. You can use this letter as you please, as I can honestly recommend Kruschen Salts to any sufferer."—C.F.

If the eliminating organs become sluggish, they permit harmful uric acid to accumulate and deposit itself in the tissues, muscles and joints in the form of needle-pointed crystals, causing excruciating pains of sciatica. The six salts in Kruschen stimulate the eliminating organs to healthy, regular action. Mischievous uric acid is then given no chance to collect.

WORLD HAPPENINGS BRIEFLY TOLD

Robert Moodie, 67, who had been for nearly 40 years connected with the circulation side of the "News of the World," being its senior representative in the South of England, is dead.

Dr. John Stanley, junior research investigator on the staff of the National Research Laboratories, formerly of Vancouver, B.C., has resigned. He has accepted the post of assistant professor of biology at Queen's University, Kingston.

A royal robe of ermine, ornamented with ermine, to be worn on state occasions only, has been ordered by the emperor of Ethiopia from a firm of Montreal furriers. His majesty insisted the order be placed "within the empire."

The order of the Red Star, the highest decoration of the Soviet government, has been awarded to Col. Hugh L. Cooper, United States engineer, for his work on the huge Dnieper power development in southern Ukraine.

Having kept a census of horses since the World War, the highest decoration of the Soviet government, has been awarded to Col. Hugh L. Cooper, United States engineer, for his work on the huge Dnieper power development in southern Ukraine.

No change is to be made in the size of Canadian one dollar bills, the finance department has recently decided. Recent rumor said the Canadian bill was to be cut down in size, much after the style of the smaller United States bills.

British Columbia's oldest pioneer, Alexander MacLean, aged 81, who came to British Columbia 74 years ago and whose memories went back to the days when the site of Vancouver was dense forest, is dead. He was born in San Francisco.

Liner Card-Sharps Have Lost Occupation

Practice Is Almost Unknown Now On Atlantic Boats

In many of the world's big cities today, including London, England, are the scattered bands of clever and well-educated men who at one time were expert card-sharps on the great luxury liners.

The depression, which brought about a scarcity of easy money, helped the police in their vigorous campaign against these men, who specialize in card-sharpping aboard ships.

Their expenses were high, and the stakes at most of the games were too low to produce any profit after paying their fares as first-class passengers.

Card-sharpping on the Atlantic liners is today almost unknown.

Would somebody hasn't thought of using a motorcycle in a jazz band.

Seaplane Base At The Pas

On Air Route Maps

Erection of a mast and wind cone on the bank of the Saskatchewan River, as a guide to fliers, will be arranged by the Board of Trade of The Pas, Man., through the co-operation of the Imperial Oil Co.

The wind cones, which will mark the landing places, and a mooring platform for pontoon equipped planes, will be arranged by the board.

It is, Weber, agent at The Pas, for the Imperial Oil Co., offered the cone and assistance in its erection, and the board accepted the offer, passing a resolution of thanks to Mr. Weber's company.

The board will have The Pas, Man., registered on Canadian air maps as a fully equipped and qualified seaplane base.

New Form Of Advertising

Interesting Process Used To Project Writing On Clouds

Sky writing, a new form of advertising in which the message is projected on the clouds at night, was demonstrated at London. The government recently decided the method was legal. The process involves the use of metal stencils placed in the beams of a powerful searchlight to cast letters on to the cloud base. The searchlight used is of 450,000,000 candle power. For skywriting purposes the limit of its really effective range appears to be a cloud base of about 3,000 feet high. Most of the legends shown contained up to twenty-five letters. Some include a design such as the British lion.

Increase Shown In

Canada-Empire Trade

Statistical Review Issued By Department Of Trade and Commerce

Canada is becoming more empire conscious in her purchases.

A statistical review, issued by the Department of Trade and Commerce, showed that nearly 30 per cent. of the Dominion's imports in July came from empire countries as compared with only 23.3 per cent. the corresponding month last year.

The percentage of foreign imports dropped from 73.7 per cent. in July to approximately 70 per cent.

Compared with the preceding July, Canadian imports last month from foreign countries registered a drop of \$10,621,346, while those from empire countries decreased by only \$2,000,000.

In July Canada wrested from the Netherlands second place among countries of the world in supplying the cheese market of the United Kingdom. But the figures of the Dominion Bureau of Statistics reports show that the leading importers were: New Zealand, 16,032,208 pounds; Canada, 12,284,288 pounds; and Netherlands, 13,484,688 pounds.

There was a sharp advance in the importation of Canadian canned salmon by the United Kingdom in July. British trade figures give the amount as 1,726,925 pounds as compared with 488,872 pounds a year ago. The United States supply last month was 463,584.

Why Outlined Profiles Are Called Silhouettes

Named After French Finance Minister Noted For Strict Economy

The black profile called silhouettes are named after Etienne de Silhouette, the Finance Minister of France in 1789. Silhouette made an immediate name for himself by the strict economy he effected in public finance. It was his policy to refuse to pay for more than "the shadow of any substance." The process of outlining profiles through by shadow on to a white sheet had just been introduced at that time, and as these pictures were considered exactly to resemble the Minister's avowed policy, his name was immediately bestowed upon them.

Liquor In Bulk

Saskatchewan Commission Planning To Follow Lead Of Other Provinces

The Saskatchewan Liquor Commission is planning to follow the lead of other provinces and import certain brands of liquor in bulk instead of in bottles.

By importing hogheads of liquor and bottling it here, a saving is effected on overhead items such as the cost of bottling and excise duty. The bulk purchase scheme, it is expected, will mean lower prices to the purchaser.

BRITISH PARLIAMENTARIANS

By the achievement of the Imperial Conference we have shown how a great group of nations can organize for trade purposes along right lines

is the opinion of the Right Honorable Mr. Philip Cunliffe-Lister, C.B.E., M.C., M.P., Secretary of State for the Colonies, expressed during a brief stop in Winnipeg on a tour over Canadian Pacific Railway lines to the west coast.

Mr. Philip was accompanied by a group of keen young British parliamentarians eager to see western Canada in the harvest season. Among them were his own private secretary, Captain T. L. Dugdale, M.P., for Richmond and Yorkshire, one of the largest agricultural constituencies in England; J. P. L. Thomas, M.P., private secretary to the Secretary of State for Dominion Affairs; Geoffrey Lloyd, M.P., private secretary to the Lord President of the Council; and Geoffrey Hinchinbrooke, private secretary to the Right Honorable Stanley Baldwin.

"In England," said the distinguished visitor, "we have taken the

tariff out of politics and put it into business, making it an entirely business proposition. The tariff has to be adjusted to what the producers need and no more. Recognition of that fact makes the agreement and the market reached at the conference. Everything was approached from the point of view of getting the equilibrium between supply and demand, so that all would be the fairer prices."

Mr. Philip felt that British manufacturers would devote more attention to developing the Canadian market as a result of the concessions made by the Dominion Government and that the situation and the market possibilities were already being studied. He was even considering the idea of results.

The Secretary of State for the Colonies and his party spent a week-end in Banff as guests at Banff Springs Hotel and the surrounding resort through which they motored. Proceeding to the Pacific Coast Mr. Philip addressed several meetings under Canadian Club auspices and also spoke at Winnipeg on his return to the board of trade luncheon at the Royal Alexandra Hotel.

Secure Animal Pictures

American Nature Association Party Meet With Success In Rockies

After four weeks on the trail along the northern boundary of Jasper National Park and the adjacent mountains of British Columbia, the American Nature Association party returned to Jasper Park Lodge with several thousand feet of big game movie picture films.

Under the leadership of Arthur N. Pack, Princeton, N.J., president of the association, the party included Lawrence S. Rockefeller, Tarrytown, N.Y., son of John D. Rockefeller, Jr.; Mrs. Pack, Mr. and Mrs. Robert W. Johnston and Mr. and Mrs. W. H. Bryan, Jr., all of Princeton.

Some novel staking was a number of fine shots for the camera crew. Wearing white costumes with hoods, Mr. and Mrs. Pack aroused sufficient interest among the ordinarily-suspicious goats to approach within a few feet of them on one occasion. In the Tanque Valley the party also obtained a herd of more than 100 caribou and acquired some fine close-ups. Later, in the Snake Indian River country, they secured a fine picture of a herd of game in the Canadian Rockies.

"I got one fine bunny," said Mr. Pack, "by dropping on hands and knees and imitating him when he lowered his head and stamped his foot to show anger. We exchanged boasts and compliments until I had crawled within ten feet of him. Then he took to his heels and it all made a fine picture."

A Worth-While Idea

Here's a little idea worth keeping tucked back somewhere in your mind. Remember that it is always a good plan to remove the spare from the rack in the rear or out of the fender well before jacking up the car to take off the flat. Otherwise, in getting the spare loose the car may be shaken enough to cause it to slip off the jack.

Iceland has 1,605 automobiles.

Recipes For This Week

(By Betty Barclay)

BANANA FETTES

2 cups ripe bananas crushed.
1/4 cup butter, melted.
2 apples.
2 bananas.
1/2 cup sugar.
1/4 teaspoon cinnamon.
1/4 cup water.

2 tablespoons lemon juice.

Pour melted butter over rice cakes crumbs and mix thoroughly. Place a layer of one-third the prepared crumb mixture on bottom of buttered baking dish. Cover with 1 apple and 1 banana, pared, and thinly sliced. Sprinkle with half the sugar, cinnamon, and lemon juice. Cover with another layer of crumbs and repeat, using remaining fruit and seasonings. Pour water over mixture. Bake in moderate hot oven (375 degrees Fahrenheit) 30 minutes. Serves 6.

COCONUT SALAD DELICIOUS

1 cup grated pineapple, drained.
1 cup coconut, premium shreds.
1/4 cup mayonnaise.

Dash of salt.

Crisp cabbage by allowing it to stand in ice water. Drain and dry thoroughly. Toss lightly together with remaining ingredients. Serve on crisp lettuce. Garnish with strips of pineapple and chopped chives. Serves 6.

"Is that your college diploma you have framed there?"

"Well, it's a sort of diploma. It's a worthless stock certificate showing that I've been through the school of experience."

"The neighbor's piano is too loud. Shut the door."

"It is shut."

"Then turn the key."—Pages Gates, Yverdon.

Your Pipe Deserves The Best!

... particularly when the best costs you no more than ordinary tobacco. Smokers realize how much more fragrant, how cool, how satisfying a pipe can be when it's loaded with Ogden's cut plug.

SUNDAY SCHOOL LESSON

SEPTEMBER 11

ISRAEL JOURNEYING TOWARD CANAAN

The Start From Sinai, verses 11-28.

"The children of Israel went off Egypt undisciplined rabble. Now they are an orderly host—they set forth according to their journeys. In due order they advanced, the camp of Judah, and then the other tribes in their prescribed order. The ark and the tabernacle and all its furnishings in the care of those appointed for this service. They went on the way to 'the place which the Lord said, I will give it to you,' unwearied as yet that more than thirty-eight years would pass before their descendants, not they themselves, would enter that Promised Land."

"The path of life we walk today."

Is strange as that the Hebrews tread.

We need the shadowing rock as they.

We need, like them, the guide of God.

The Proposal To Mosheh, verses 29-32.

Hobab was Moses' brother-in-law, according to Judges 4:11, the son of Jethro, who had visited Moses at Sinai and had returned to his home, Exodus 18:27. Before starting on the march Moses brought Hobab to the way of the great monument of humanity, gaining nothing as general help, but by simply reproducing the habits and treasures of the fathers, Hobab's advice had no prospect, no future. Compared with that poor outlook, how good it would be to share the noble task of establishing on the soil of Canaan a nation devoted to truth and righteousness, in league with the living God, destined to extend His kingdom, and make His faith the message of blessing to all.—Robert A. Watson.

Can you truthfully say to others if they come with you, you will do them good? Are you high-minded and true, so that your association with others will help to elevate and enable them?

Church Service Held

On Nelson's Flagship

Was Notable Event Of Navy Week At Portsmouth

Naval officers and bluejackets stood bareheaded with citizens of Portsmouth, on the Navy Day, when the service for the first public church service that has ever been held to usher in Navy Week.

More than a thousand people gathered on the stone pavers below surrounding the famous old warship. A small group of people afterwards filled Nelson's day cabin, two decks below, surrounded by his own furniture, to receive communion from the admiral's own communion plate.

A Record For Speed

Parcel From Montreal Reached Baghdad In Thirteen Days

From Montreal to Baghdad in 13 days—this is the record established in sending a 10-pound express consignment of Canadian industrial products to Baghdad.

Of the 13-day period, seven days were taken for an ordinary steamship crossing from Montreal to Liverpool. From the Merseyside the package was expressed to London, thence by automobile to Croydon airport where it was just in time to catch the London-Indian mail plane. On the 13th days of its journey the consignment arrived in Baghdad.

A new market in the Near East.

Why argue? If you are right, you are going. And being wrong means you so mad you don't want to learn.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET FIEDLER
Author of
"The Splendid Folly," "The Hermit of Far West,"
"Holler & Hough," etc., London.

CHAPTER XXXI.—Continued

She made no pretence at mourning the man who had turned her life into a living hell for nearly three years and who had stood like a gaoler between her and the happiness which might have been hers had she been free. But the conventions, as well as her own feelings, dictated that a decent interval must elapse before she and Nick could be married, and this would be for her a quiet period dedicated to the readjustment of her whole attitude towards life.

The length of that period was the subject of considerable discussion. Nick protested that six months was amply long enough to wait—too long, indeed!—but Claire herself seemed disposed to prolong her widowhood into a year.

"It isn't in the least because I feel I owe it to Adrian," she said in answer to Nick's protest. "I don't consider that I owe him anything at all. But I feel so battered, Nick, so utterly tired and weary after the perpetual struggle of the last three years, that I don't want to plunge suddenly into the new duties of a new life—not even into new happiness. It's difficult to make you understand, but I feel just like a sponge which has soaked up all it can and simply can't absorb any more of anything. You must let me have time for the past to evaporate a bit."

But it required the addition of a few commonsense observations on the part of Lady Anne to drive the nail home.

"Claire is quite right, Nick," she told him. "She is temporarily worn out—mentally, physically and spiritually spent. Her nerves have been kept at their utmost stretch off and on for years, and now that release has come they've collapsed like a fiddle-string when the peg that holds it taut is loosened. You must give her time to recover, to key herself up to normal pitch again. At present she isn't fit to face even the demands that big happiness brings in its train."

So Nick had perforce to wait to Claire's decision and it was settled that the first month or two, at least, of her widowhood Jean should devote herself and her belongings from the pile and bear her company at Charnwood. And meanwhile Nick and Claire would spend many peaceful hours together of quiet happiness and companionship, while Claire, as she herself expressed it, "rebuild her soul."

To Jean the issue of events had brought her nothing but pure joy. Her belief had been justified, and the grim gateway of death had become for these two friends of hers the gateway of happiness.

She had neither seen nor heard any-

thing of Burke since the day she had fled from him on the Moor, although indirectly she had discovered that he had quitted the bungalow the day following that of her flight from it and had gone to London.

Judith sent her a brief, rather formal letter of congratulation upon her engagement, but in it she made no reference to him nor did she endeavor to explain away or palliate her own share in his scheme to force Jean's hand. Probably an odd kind of loyalty to her brother prevented her from clearing herself at his expense, added to a certain dogged pride which refused to let her extenuate any action of hers to the daughter of Gipsy Peters.

But none of these things had any power to hurt Jean now. In her new roomness she felt that she could find it in her heart to forgive anybody anything! She was even conscious of a certain tentative understanding and indulgence for Burke himself. He had only used the "primitive man" methods his temperament dictated in his effort to win the woman he wanted for his wife. And he had failed. Just now, Jean could not help sympathizing with anybody who had failed to find the happiness that he bestows.

She reflected that the odd Gypsy on the Moor had been wonderfully correct in her prophecy concerning Nick and Claire. The sun was "shining but not for them at all, just as he had assured them that it would."

And, with the same, came a sudden clutch of fear at Jean's heart, like the touch of a strange hand. The gipsy had had other words for her—harsh, or less sweet-sounding.

"For her darkness come! . . . black darkness!"

She shivered a little. She felt as though a breath of cold air had passed over her, chilling the warm blood that ran so joyously in her veins.

CHAPTER XXXI.

An Unwelcome Visitor

Blaise was seated at his study-table regarding somewhat dubiously a letter which lay open in front of him. It was written in a flowing, foreign hand and expressed with a quaintly stilted, un-English turn of phrase. The heading of the notepaper upon which it was inscribed was that of a hotel in Ester.

"Dear Mr. Tormarin," it ran. "You will, without doubt, be surprised to receive a letter from me, since we have met only once and I have promised you of the most importance to confide in you, and I therefore beg that you will accord me an interview."

"Dear Mr. Tormarin," it ran. "You will, without doubt, be surprised to receive a letter from me, since we have met only once and I have promised you of the most importance to confide in you, and I therefore beg that you will accord me an interview."

The letter was signed M. D.

Blaise had received this thought-provoking epistle two days previously, and had been impressed by an uncomfortable consciousness that it fore-

boded something unpleasant. He could not imagine in what manner the affairs of Madame de Varigny impinged upon his own, or rather, as she seemed to imply, upon those of his future wife, and this very uncertainty had impelled him to fix the interview the Countess had demanded at an early moment as possible. Discrepancies were best met and faced without delay. So now he was momentarily awaiting her arrival, still unable to rid himself of the impression that something of an unpleasant nature impended.

Impelled through the open window facing him. Afterwards, he was always able to recall every little detail of the picture upon which his eyes rested. It was etched upon his mind as inextricably as though cut upon steel with a graver's tool.

Although the mellow sunlight of September flooded the lawn and terraces, that indescribable change which heralds autumn had already begun to manifest itself. Not that any hint of chill as yet edged the balmy atmosphere or that of sunset reddened the gently waving foliage of the trees. It was something less definite—a suggestion of maturity, of completed ripening, conveyed by the deep, rich green of the grass, the strong, woody growth of the trees, the full-blown glory of the roses nodding on their stems.

To the left, in the shade of a stately oak, Lady Anne and her guests were engaged with their sewing and writing materials at hand, and the rays of sunshine, filtering between the widespread branches above them, woke fugitive gold and silver lights in the downy auburn and white-crowned heads. Further away, in the valley below, the brown smudge of a wide-bottomed boat broke the smooth expanse of the lake whence the mingled laughter of Nick and Claire came floating up to the breeze.

It was a peaceful scene, full of intimate happiness and tender promises, and Blaise watched it with contented eyes. The voice of Blaise, formal and urbane, roused him from a pleasant reverie.

"Madame de Varigny," announced that functionary, throwing open the door and standing aside for the visitor to enter.

Blaise rose courteously to greet her, holding out his hand. But the Countess shook her head.

"No, I will not shake hands," she said abruptly. "When you know me I am come, you will not want to shake hands with me."

There was something not unattractive about the outspoken refusal to shake hands with the Countess, more especially as it was, by the charm of the faintly foreign accent and intonation.

Madame de Varigny had paused a moment in the middle of the room and was regarding her host with curiously appraising eyes, and as Blaise returned her gaze he was conscious, as once before at the fashion-dress ball at Montevana, of the strange sense of familiarity this woman had for him.

"I am sorry for that," he said, answering her refusal to shake hands. "Won't you, at least, sit down?" pulling forward a chair.

"Yes, I will sit."

She sank into the chair with the quick, graceful motion of the South, and continued to regard Blaise with fully between the black rim of her lashes. Had Jean been present, she would have been struck anew by the expression of implacability which hardened the dark brown eyes. By that, and by something else as well—a look of unmistakable triumph.

"I have much—much to say to you, Monsieur Tormarin," she began at last. "I will commence by telling you a little about myself. I am—"

Then she looked away for a moment, then she said, "I am—"

"an Italian by birth."

(To Be Continued.)

Science Perfects Cure

For Car Drowsiness

Ancient Chinese Drug Is Said To Be Effective

Science has found a cure for the driver who falls asleep at the wheel of his automobile. Narcolepsy, the name given to sudden spells of irresistible sleepiness, has been cured, it is claimed, by the use of a drug which is said to be of Chinese origin. 4,000 years ago, Dr. Harry A. Collins, who announced the cure, declared one case had responded instantly, after recurring attacks for 12 years had caused him to have several automobile accidents.

Pelicans have no song and the adults no call-note, while the young call for food with a low, grating, rising at times to a shrill scream.

Most woodpeckers bore round holes in trees, but the pileated woodpeckers dig both round and square holes.

It does pay to "ROLL YOUR OWN"

From the standpoint of economy—each 20c. package of Turret Fine Cut contains the makings for at least 20 cigarettes—and Chantecleer cigarette papers free.

From the standpoint of real smoking pleasure, there's nothing like rolling your own with the smooth, mellow, fragrant Virginia tobacco that you get in the Turret Fine Cut package.

It does pay to roll your own with Turret Fine Cut.

15c and 20c packages
each in 15 lb.
vacuum tins

FREE Chantecleer cigarette papers with every package.

Believe It Or Not

Resident of Halifax Comes Along With Good Fish Story

The best fish story of this season was told by a resident of historic old Halifax. The story is about a gold fish, not the one who had no privacy, but an extremely adventurous gold fish.

The gold fish, according to a reputable Halifax Journal, jumped four feet from its bowl to a chandelier, where it lay in a state of coma for goodness knows how long. Discovered by its heart-broken owner before eight months had set in, it was placed in cold water. No hurt. But upon being held over the stove it was reminded of its old home among the rice fields of Japan and gave several encouraging wiggles. Back again in its natural element it resumed its exposed and restricted life, if restricted, moreover. Believe it or not, and wonder what a gold fish thinks about.

THE RHYMING OPTIMIST

By Alice Michalski

LIKE FLOWERS

Women are like flowers:
Jasmine and rose
Though June's sunny hours
All their charms disclose.
Mignonette and lily,
Larkspur, coral spray,
Under breezes chilly
Shrink and fade away.
But when Summer gaily
Dances down the leaves,
They are fairer daily
To her little refrain:
Love is sunshine, falling
When morn's mists depart:
Love is summer, calling
When the roses bloom:
Woman are like flowers:
Until life is done
Lying for those hours
When they see love's sun.

To Beat Unemployment

Germany Plans To Put University Graduates On Farms

Placing university trained young men on farms is the object of associations formed in Berlin and Leipzig. Germany, among the university people themselves. Jobs as agricultural laborers are being sought for thousands. Because, within a short time every third university trained man in Germany will have to join the ranks of the unemployed, unless something is done about it, efforts are being made to get farm work for so many as possible of the 60,000 academically trained men now unemployed.

Externally Or Internally, It Is Good. When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

German Medical Men

Solve Old Problem

Chain Jealousy Cured By Excess Of Indies In Blood

A number of prominent German medical men have solved the mystery of jealousy that has baffled the human race for many centuries. The Berlin physicians simultaneously experimented on a number of women in municipal hospitals and have now come to the conclusion that an excess of iodine in the blood causes men and women to become jealous.

The medical men asked for volunteers to submit to experiments. The men were too proud and did not apply, but a great many women volunteered and allowed themselves to be hypnotized. The blood was drawn from them and submitted to microscopic examination. It was proven that the blood of jealous women had a hundred per cent. more iodine than that of women not so disposed.

Always keep Douglas' Egyptian Liniment at hand, ready to bring immediate relief to burns, sores and chafes. Burns, bleeding at once. Prevents blood poisoning. Splendid for sore throat and quinsy.

Three-In-One

"Did my medicine do good? I took 'A' as a remedy for cold. I took three spoonfuls and my cough went. I rubbed three spoonfuls into my knee for rheumatism, and the rest we used to clean the silver!"

It is said that "no man is a hero to his valet"—but if you want to get out of real "low-down" you should know what his banker thinks of him.

"Sir, my wife said I was to ask for a 'low-down' you should know what his banker thinks of him."

"Good, I'll ask my wife if I may give you one."

Redemption Project

Redemption of 10,000 acres of rich silt lands on the Kootenay River flat at an expenditure of \$300,000 will be started this fall, it was announced by Hon. N. S. Loughhead, British Columbia Minister of Lands. The project will be completed within two years.

Building construction in Shanghai, China, is increasing.

Playing the game is the thing, not the score.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much literature being given to eliminating unnecessary household work, it is only natural that a workable solution for the many dust cloths should be sought.

Now it has been found! Appleford Wonder Paper which actually duster—wipes clean—as it polishes! It is a heavy-duty paper from Canadian women who detest dust cloths and all they stand for. Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it.

Appleford Wonder Paper comes in handy-size packages, twenty-four sheets, each as large as a doily. You merely crumple a sheet into a soft wad and go over the surface requiring attention.

You'll be amazed at the quick and lasting finish. Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper for the next cleaning.

And when you're through—throw it away. No dust to shake out or wash. No bother at all. The most obvious part of housework done in half the time with less effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous VARSANI heavy wad paper in the Green Box. Most grocery stores and department stores sell Appleford Wonder Paper. If yours does not, send for a free and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ont. Please Enclosed find 25c for which you will receive one full-size package of WONDER PAPER and 100 recipes for "Leftovers."

All Her Children were Troubled With Diarrhoea

Mrs. J. J. Bickert, R.R. 1, Enderby, B.C., writes:—"Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

About Town and Country

Millinery Opening September 16-17. Full range of Fall and Winter Millinery and Chenille Berets at very reasonable prices. Well worth inspecting. At my home on Second avenue. Mrs. R. E. Gillespie. (Out of town September 20-21, 22).

Public auction of farm implements, machinery etc. at the farm of Fred Langford on Thursday, September 22.

Mr. and Mrs. John Lembke of Pine River, Minn., arrived from the States during the latter part of August to look after their crop, interests south of Benton and expect to stay in the district until the latter part of this month.

Mr. and Mrs. W. M. Sanders and family who were visitors at the home of Mr. John Sanders, Lundine, over the week end drove into Oyen Monday morning, before starting on their return trip to their home in High River, Alta.

Mr. and Mrs. John Lockhart and son Fred and Miss Dorothy Love of Saskatoon spent the week end in Oyen, visiting Mrs. J. Love and family.

Mr. Robert McLaren and Mr. Walter Marshall motored to Pine Lake last Sunday and returned to Oyen Tuesday evening with a nice catch of fish. Bob, who hooked a nice rod (in about three fathoms of water) admitted that some of the best fish got away from them.

Mr. Fred C. Bliss, who is making satisfactory progress in Cerebral hospital, says he has never felt better since the eclipse.

Mrs. and Mrs. G. S. Peck left last Friday for Cochrane, Alta., where they will visit Mr. and Mrs. Hubert Peck. They were accompanied to Calgary by Mrs. J. Green.

Mr. and Mrs. V. E. French and family were week end visitors at Madison, Sask.

Rev. and Mrs. E. B. Brundage and family were the guests of Mr. and Mrs. E. E. Neill last week, while en route to their home in Strathmore, after a motor trip to the Maritime provinces.

Mr. and Mrs. Geo. D. McMillan and family of Excal were home again after a holiday spent at the coast.

Mrs. Desso returned home last Friday from Edmonton, where she has been visiting her daughter Mrs. H. Hancock.

Mr. and Mrs. Chas. L. Dunford and family and Mr. and Mrs. C. S. Wright, were the guests of Mr. and Mrs. John Naismith in Coronation last Sunday.

Mr. M. G. Whitlock returned to Oyen this morning, after seeing his family comfortably settled in Saskatoon.

Thomas Audibert Dies At His

Home in Oyen After Long Illness

After a long and trying illness, lasting almost two years, Mr. Thomas Audibert passed to his reward on Saturday last at his home here, at the age of eighty years and three months.

The funeral was conducted on Monday, Sept. 5, from Sacred Heart Church, Oyen, where Solemn Requiem High Mass was celebrated by Rev. Father Lynott, assisted by Rev. Fr. Fay as Deacon and Rev. Fr. Sullivan as Sub-deacon, thence to Oyen cemetery where burial took place, the same ministers officiating at the grave.

Those who acted as pall-bearers were Felix Auger, Arsene Carrier, J. J. Purcell, H. J. Desmond, N. Pokojowy and P. Krawski.

The late Mr. Audibert was born in Portland, Maine, May 29, 1852 and in 1880 married Alstina Mary Dugie, with whom he lived to enjoy fifty-two years of wedded life.

In 1911 he moved his family west to Calgary and in September 1912 settled near Excal. 9 years ago he retired from farm labor and came to Oyen to spend his declining years. Seven of these years he spent as caretaker of Sacred Heart Church and Rectory, removing two years ago to his own residence on First avenue.

He is survived by his widow, three sons and one daughter, Alvin, Los Angeles; Rennie, Eagle Lake, Maine; Alpheo, Excal; and Mrs. Bernard E. Kelly, Toronto.

Floral offerings were received from Mrs. J. W. Robinson, Mrs. S. A. Miller and Miss J. Conlon.

Spiritual offerings came from the following: Rev. J. F. Fay, Hanna; Rev. Leo Sullivan, Empress; Rev. A. C. Lynett, Catholic Women's League, Oyen; Mr. and Mrs. C. Reil, Mrs. W. D. Morrell, Miss Catharine Wright, Mr. and Mrs. J. J. Purcell, Mrs. and Arthur Grant, Mr. and Mrs. Krawski, Mrs. J. C. Desso, Miss J. Conlon, Mr. H. C. Desmond, and Miss Cleophas Desmond.

Would You Cook An Unwashed Potato?

YOU would not think of serving potatoes or other vegetables from the garden without thoroughly washing them. Why use flour made from unwashed wheat?

If you were to examine a grain of wheat under a magnifying glass, you would find it covered with dirt and bacteria similar to the soil and scab which adhere to a potato when it comes from the hill. The "crease" of the kernel holds dirt with a tenacity that requires scrubbing and scouring such as you use to clean the skin and eyes of a potato.

Good wheat may look clean, but you should visit one of the great modern mills of Robin Hood and see their huge washing machines at work, each one using 100,000 gallons of water every 24 hours. With your own eyes, and feel with your own hands the yellow mud and fibrous waste which is washed from the wheat before it is milled into Robin Hood flour.

Flour made from unwashed wheat has a dark color and the foreign material which it contains gives a bad taste to your bread. Robin Hood flour, made from washed wheat, is white in color and gives a rich flavor to your bread, cakes and pastry. It is the safe, sensible flour for your home.

STUDY THIS PICTURE— THEN THINK

The difference in cost between CLEAN, PURE Robin Hood flour, and CHEAP, poorly milled flour is only 1c PER DAY FOR A FAMILY OF FOUR.
